The D452 basic bungalow was also designed as a "second house" providing optimal conditions for spending holidays away from home. Ideal for two couples or a couple with a child and for their guests who can comfortably sleep on the sofa bed in the living room. The roof falls at 30 degrees, which makes it possible to create an extra storage space at the attic. The module can be modified to add a carport, studio or garage. Terrace and entry niche is finished with wooden decking.
